MB25 & MBA25 Discontinuance

End-of-Life Notification: Series MB25 & MBA25
Effective Date: July 2024

Dear Valued Customer,

This notice serves to inform you that the MB25 and MBA25 series products were officially phased out as of July 2024. Once existing inventory is depleted, these units will no longer be available for purchase.

To ensure product continuity, we recommend transitioning to the MG22 Series as the suggested substitute. The MG22 series provides comparable performance and functionality, ensuring a smooth migration with minimal impact on your operations.

We encourage customers to place any final orders for MB25 or MBA25 units as soon as possible, while limited stock remains available.

If you have any questions regarding this product transition or require assistance selecting an appropriate replacement, please contact our sales support teams.

Thank you for your continued partnership and understanding as we work to offer the most current and efficient product solutions.

Sincerely,

A handwritten signature in black ink, appearing to read "James Wilkes".
